

C NITRA CID D[®]

Acid cleaner for CIP systems

Product description

NITRA CID is an acid cleaner for decalcifying and removing persistent protein and iron deposits.

Properties

NITRA CID is based on nitric acid and phosphoric acid, foam breakers and wetting agents.

NITRA CID is especially developed for the use in CIP systems for the dairy and beverage industry and for the decalcification of the bin washing machines.

Directions for use

Rinse the installation thoroughly with clean water before the application.

Let circulate a solution of 0.5 – 2 % **NITRA CID** at a temperature of 50 to 60°C during 10 tot 15 minutes.

Rinse with clean water

Specifications

Appearance:	Clear colourless non foaming liquid
pH (1%):	0.5 – 2.5
Density (20°C):	1.170 kg/l
Freezing point:	-10°C

Corrosion data and -precautions

Never mix with chlorine products !
Please check the MSDS.
